---

August 21, 2016

Continued setting up `PrimeSense` and `Kinect`. Having problems with `Java` extensions in `OpenNI2`. Successfullly set up `Kinect` on Linux laptop, but had issues with `Primesense Carmine`. I tried the `Primsense Carmine` on an old `MacOSX` system using `Homebrew` set up which worked.

Put sample screen shots in `Wood_Kamangar/StatusReports/StatusReport_15`.
