Research Log - Week 15

JeffGWood@mavs.uta.edu

August 29, 2016

August 21, 2016 | Continued setting up `PrimeSense` and `Kinect`. Having problems with `Java` extensions in `OpenNI2`. Successfullly set up `Kinect` on Linux laptop, but had issues with `Primesense Carmine`. I tried the `Primsense Carmine` on an old `MacOSX` system using `Homebrew` set up which worked.

Put sample screen shots in `Wood_Kamangar/StatusReports/StatusReport_15`.

August 26, 2016 | Spent all day coding countdown mechanism. Since it uses `ncurses` library, it may have to be discarded for code that displays coundown in its own window rather than on the console.

August 27, 2016 | Coded `Camera` class in `c++`, and started codin `Cameras` collection object. Code is meant to expand to calibration for any number of cameras attached to system (for possible inclusion of 3rd camera).
